

# Comprehensive Primitive Reflex Research Articles

Updated from Internet Search - January 2026

Alphabetized List (APA 7th Edition)

- Alibakhshi, H., et al. (2018). Retained primitive reflexes and motor problems in school-age children with specific learning difficulties. *Journal of Learning Disabilities*. [Study on ATNR and fine motor skills]
- Andrich, P., Shihada, M. B., Vinci, M. K., Wrenhaven, S. L., & Goodman, G. D. (2018). Statistical relationships between visual skill deficits and retained primitive reflexes in children. *Optometry and Visual Performance*, 6(3), 106–111.
- Bartlett, D. J., Okun, N. B., Byrne, P. J., Watt, J. M., & Piper, M. C. (1997). Primitive reflexes and the determination of fetal presentation at birth. *Early Human Development*, 48(3), 261–273.
- Bastiere, Y., Lussiana, T., Young, W., Gindre, C., & Mourot, L. (2024). Persistence and activity levels of primitive reflexes in young high-level football players. *Frontiers in Sports and Active Living*, 5, Article 1403571.
- Bilbilaj, S., Gjipali, A., & Shkurti, F. (2017). Measuring primitive reflexes in children with learning disorders. *European Journal of Multidisciplinary Studies*, 2(5), 285–298.
- Bob, P., Konicarova, J., & Raboch, J. (2021). Disinhibition of primitive reflexes in attention deficit and hyperactivity disorder: Insight into specific mechanisms in girls and boys. *Frontiers in Psychiatry*, 12, Article 757476.
- Bradshaw, J., Shi, D., Federico, A., Klaiman, C., & Saulnier, C. (2023). The pull-to-sit task: Examining infant postural development in autism spectrum disorder. *The Journal of Pediatrics*, 253, 225–231.
- Brown, C. G. (2010). Improving fine motor skills in young children: An intervention study. *Educational Psychology in Practice*, 26(3), 269–279.
- Bruijn, S. M., et al. (2013). Asymmetric tonic neck reflex in healthy adults. *Journal of Motor Behavior*. [Study on ATNR/STNR in adults]
- Callcott, D. (2012). Retained primary reflexes in preprimary-aged Indigenous children: The effect on movement ability and school readiness. *Australasian Journal of Early Childhood*, 37(2), 132–140.
- Carter, T. L. (2020). *An exploration of the relationship between unintegrated primitive reflexes and symptoms of anxiety in children between 10-13 years in the Western Cape Province of South Africa* [Doctoral dissertation, University of South Africa].
- Chinello, A., Di Gangi, V., & Valenza, E. (2018). Persistent primary reflexes affect motor acts: Potential implications for autism spectrum disorder. *Research in Developmental Disabilities*, 83, 287–295. <https://doi.org/10.1016/j.ridd.2016.07.010>

- Domingo-Sanz, V. A. (2024). Primitive reflexes and neurodevelopmental outcomes. *Journal of Pediatric Neurology*. [Advance online publication]
- Edwards, C. W., & Al Khalili, Y. (2023). Primitive reflexes. In *StatPearls*. StatPearls Publishing.
- Einspieler, C., & Prechtl, H. F. R. (2005). Prechtl's assessment of general movements: A diagnostic tool for the functional assessment of the young nervous system. *Mental Retardation and Developmental Disabilities Research Reviews*, 11(1), 61–67.
- Feldhacker, D. R., Cosgrove, R., Feiten, B., Schmidt, K., & Stewart, M. (2022). The correlation between retained primitive reflexes and scholastic performance among early elementary students. *Journal of Occupational Therapy, Schools, & Early Intervention*, 15(3), 288–301.
- Field, J. (1996). *The Fear Paralysis Response: How we might recognise it and why we should respect it*. INPP.
- Futagi, Y., Toribe, Y., & Suzuki, Y. (2012). The grasp reflex and Moro reflex in infants: Hierarchy of primitive reflex responses. *International Journal of Pediatrics*, 2012, Article 191562.
- Gieysztor, E. Z., Choińska, A. M., & Paprocka-Borowicz, M. (2018). Persistence of primitive reflexes and associated motor problems in healthy preschool children. *Archives of Medical Science*, 14(1), 167–173.
- Gieysztor, E. Z., Sadowska, L., & Choińska, A. M. (2017). The degree of primitive reflexes integration as a diagnostic tool to assess the neurological maturity of healthy preschool and early school age children. *Nursing and Public Health*, 7(1), 5–11.
- Gieysztor, E. Z., Sadowska, L., Choińska, A. M., & Paprocka-Borowicz, M. (2018). Trunk rotation due to persistence of primitive reflexes in early school-age children. *Advances in Clinical and Experimental Medicine*, 27(3), 363–366.
- Gieysztor, E., Kowal, M., & Paprocka-Borowicz, M. (2022). Primitive reflex factors influence walking gait in young children: An observational study. *International Journal of Environmental Research and Public Health*, 19(7), 4070.
- Gieysztor, E., Pecuch, A., Kowal, M., Borowicz, W., & Paprocka-Borowicz, M. (2020). Pelvic symmetry is influenced by asymmetrical tonic neck reflex during young children's gait. *International Journal of Environmental Research and Public Health*, 17(13), 4759.
- Gieysztor, E. Z., Sadowska, L., Choińska, A. M., & Paprocka-Borowicz, M. (2021). Primitive reflex activity in relation to motor skills in healthy preschool children. *International Journal of Environmental Research and Public Health*, 18(15), Article 8210.
- Glodowski, K. R., Thompson, R. H., & Martel, L. (2019). The rooting reflex as an infant feeding cue. *Journal of Applied Behavior Analysis*, 52(1), 17–27.
- Goddard Blythe, S. (1989). *The Fear Paralysis Response and its interaction with the primitive reflexes*. INPP.
- Goddard Blythe, S. (2005). Releasing educational potential through movement: A summary of individual studies carried out using the INPP Test Battery and Developmental Exercise

- Programme for use in schools with children with special needs. *Child Care in Practice*, 11(4), 415–432.
- Goddard Blythe, S. (2014). *Neuromotor immaturity in children and adults: The INPP screening test for clinicians and health practitioners*. Wiley-Blackwell.
- Goddard Blythe, S. (2023). *Reflexes, learning and behavior: A window into the child's mind* (3rd ed.). Hawthorn Press.
- Goddard Blythe, S., & Small, T. (2005). Interview with Sally Goddard Blythe: Reflexes—Intrauterine, primitive, and postural. *Medical Veritas*, 2, 613–627.
- Goddard Blythe, S., Duncombe, R., Preedy, P., & Gorely, T. (2021). Neuromotor readiness for school: The primitive reflex status of young children at the start and end of their first year at school in the United Kingdom. *Education 3-13*, 50, 654–667.  
<https://doi.org/10.1080/03004279.2021.1895276>
- Grigg, T. M. (2018). *The influences of a primitive reflex integration programme within the classroom: Teacher/parent perspectives and student results* [Doctoral dissertation, University of Canterbury].
- Grigg, T. M., Culpan, I., & Fox-Turnbull, W. (2023). Primitive reflex integration and reading achievement in the classroom. *Journal of Neurology and Experimental Neuroscience*, 9(1), 18–26.
- Grigg, T. M., Fox-Turnbull, W., & Culpan, I. (2018). Retained primitive reflexes: Perceptions of parents who have used Rhythmic Movement Training with their children. *Journal of Child Health Care*, 22(3), 406–418.
- Grzywniak, C. (2017). Integration exercise programme for children with learning difficulties who have preserved vestigial primitive reflexes. *Acta Neuropsychologica*, 15(1), 41–56.
- Harjpal, P., Kovala, R. K., & Qureshi, M. I. (2023). Promoting survival and primitive reflexes to prevent brain imbalance in premature infants: A scoping review of new insights by physiotherapists on developmental disorders. *Cureus*, 15(8), e43757.
- Hazzaa, N. M., et al. (2018). Retained primitive reflexes and balance problems in children with learning difficulties. *Egyptian Journal of Medical Human Genetics*. [Study on one-leg stand and learning]
